Introduction	
How to Use This Book	
For the Non-Scientist	
For the Scientist	
Recommended Reading	
Chapter 1: The Altitude Challenge	
Human Responses to Altitude	
You Are a Unique Individual	
How High Is “High Altitude”?	
Chapter 2: The Air, the Body, and Oxygen	
Altitude and Atmospheric Pressure	
Biological Differences	
The Quest for Oxygen	
Respiratory System	
Mechanics of Ventilation	
The Control of Breathing at Low Altitude	
The Control of Breathing at High Altitude	
Cardiovascular System	
The Structure and Function of the Heart	
The Flow of Blood through the Body	
Blood Pressure, Heart Rate, and Cardiac Output	
Blood	
Transport of Oxygen and Carbon Dioxide	
CO ₂ Transport	
O ₂ Transport	
The Oxygen Cascade	
The Oxygen Cascade at Sea Level and at Rest	
The O ₂ Cascade at Altitude	
The Effect of Exercise at Low and High Altitudes	
Increasing O ₂ Delivery to the Tissues at Altitude	

Chapter 3: The Biology of Exercise	
Skeletal System	
Muscles	
Types of Muscle Fibers.....	
Muscle Control and Strength	
Arrangement of Muscles, Muscle Actions, and Types of Contractions	
Concepts of Exercise Physiology	
Limits to Performance.....	
Factors That Determine Performance.....	
Maximum O ₂ Uptake and Muscle Limitation.....	
O ₂ Supply to Other Organs	
Muscle Fatigue	
The Brain	
Biomechanics and Economy of Movement.....	
Lactic Acid and Performance.....	
So, What Really Limits Performance?.....	
Fatigue, Will, and Performance.....	
Direct Environmental Stresses	
Physiological Stresses.....	
Indirect Psychological Stresses.....	
Will and Motivation	
 Chapter 4: Acclimatization	
Factors Affecting Acclimatization	
Changes That Occur during Acclimatization	
Acclimatization versus Deterioration above 5,500 m	
How Quickly Do You Deacclimatize after Return to Lower Altitudes?	
Age and Sex	
Sex.....	
Older Travelers.....	
Children	
Acclimatization Strategies	
Preacclimatization	
Practical Advice.....	
Specific Situations.....	
Day Hikes/Climbs	
Overnight Backpacking Trips	
Trekking	
Climbing Expeditions	
Drugs as Aids to Acclimatization and Performance	
 Chapter 5: Altitude Illness	
Encountering Illness at Altitude.....	
Physicians at Altitude	
A General Approach to the Potentially Ill	

- Primary Symptoms of Altitude Illness
- Prevalence of Altitude Illness
- Risk Factors for Altitude Illness.....
 - Acute Mountain Sickness (AMS)
 - High-Altitude Cerebral Edema (HACE)
 - High-Altitude Pulmonary Edema (HAPE)
 - High-Altitude Retinal Hemorrhage (High-Altitude Retinopathy, HAR).....
- Treatments for Altitude Illness.....
- Other Medical Issues at Altitude

Chapter 6: Experiences at Altitude: Circulation, Respiration, Nervous System, and Immunity

- Circulatory System
- Carbon Monoxide Poisoning.....
- Respiratory System
- High-Altitude Pulmonary Edema (HAPE)
- Periodic Breathing
- Cough
- Pleurisy
- Smoking.....
- The Nervous System
- Behavioral Effects
- Critical Altitudes
- Peripheral Nervous System.....
- Sleep
- Practical Advice
- Daytime Somnolence (Excessive Sleepiness).....
- The Immune System.....
- Practical Advice

Chapter 7: Experiences at Altitude: Food, Digestion, Hydration, and Hygiene

- Appetite, Digestion, and Weight Loss
- Appetite.....
- Digestion.....
- Cellular Respiration and Fuel Supplies for the Cells
- Insulin and Other Hormones.....
- Energy Expenditure by the Body.....
- Fuel.....
- Practical Advice
- Diet and Supplements
- Performance-Enhancing Aids
- Oral and Gastrointestinal Experiences
- Mouth and Throat.....
- Gastrointestinal Issues.....

- Dehydration and Thirst
 - Pathways of Water Loss
 - Effects of Dehydration on Performance
 - Thirst.....
 - Electrolytes
 - Practical Advice
- Food and Water Safety
 - Practical Advice
 - Alpine Climbs, Hikes, and Backpacking Trips
 - Less-Developed Countries
 - Treks and Expeditions.....
 - Away from Base Camp or the Kitchen
 - Garbage.....

Chapter 8: Heat and Cold

- Cold.....
 - General Effects of Cold.....
 - Maintaining Temperature Homeostasis
 - Nonfreezing Peripheral Cooling
 - Frostbite
 - Practical Advice.....
 - Hypothermia.....
 - Practical Advice.....
- Heat and Solar Issues.....
 - Peripheral Heat Injury
 - Sunburn.....
 - Canker Sores, Cold Sores, and Fever Blisters
 - Snowblindness
 - Overheating the Core
 - Glacier Lassitude
 - Heat Exhaustion
 - Heat Stroke.....

Chapter 9: Interpersonal Relations

- The Team.....
 - Friends versus Strangers
 - Guided Trips.....
 - Experience
- Relationships Among Team Members.....
 - Choosing the Team
 - Interactions within the Team
 - Women and Men
- Interactions with Teams or Individuals from Other Cultures.....
- Leadership.....

Local Cultures
 Theft
 Gender Issues
 Communication Issues
 Other Advice

Chapter 10: Extreme Altitude

Basic Questions
 How Long Can You Stay in the Death Zone?
 What Factors Influence Your Ability to Function in the Death Zone?
 Supplemental O₂
 Is Oxygen Ethical?
 Style and Ethics on 8,000 m Peaks
 Crowding
 Fixed Ropes
 Parasitism
 Speed Climbing
 Rescue at Extreme Altitude
 I'll Rescue You If You'll Rescue Me
 Practical Advice
 Family, Friends, and "Why?"
 Mental Outlook at Extreme Altitude

Chapter 11: Decision Making and Accidents

Decision-Making Issues
 Direct Effects of Hypoxia
 Emotional Infrastructure
 Indirect Stresses
 Group Dynamics
 Danger versus Effort
 Intuition
 Practical Advice
 Accidents and Tragedy
 Causes of Accidents
 How Accidents Happen
 Inadequate Equipment
 Passion
 Fatigue
 Poor Decision Making
 Luck and Fate
 When Accidents Happen
 After an Accident
 Death
 Your Responsibilities
 After a Death

Chapter 12: Preparing for Altitude
Limits to Performance
Response to Training
Developing a Training Program
Determine Your Goals
Determine Your Weakest Link
Musculoskeletal System
Cardiovascular System
Metabolic/Physiological System
Psychological System
Construct Your Training Program
Training
Debriefing
Practical Advice for Training
Where to Train?
General Pitfalls
Strength Training
Aerobic Training
Training the Ventilatory Muscles
Overtraining
Pretrip Body Weight Management
Chapter 13: Before, During, and After Your Trip
Before Your Trip
Planning
Organizing the Trip
During the Trip
After Arrival
Techniques for Backcountry Travel
The Importance of Rhythm in Movement
Typical Ascent Rates during Climbs
Getting Up in the Morning
Enforced Inactivity
Dealing with Altitude, Stress, and Emotional Issues
After the Trip
Physical Issues
Immune System
Appendix A: Some Scientific Background
The Atmosphere
The Behavior of Gases
Biological Concepts
Homeostasis

Getting Work Done in the Body
 How Do Substances Move from One Place to Another?
 How Do Molecules Get Assembled and Taken Apart?

**Appendix B: Lake Louise Scoring System for
Acute Mountain Sickness (AMS)**

Appendix C: Children’s Lake Louise Scoring System for AMS

Appendix D: Literature Cited

Appendix E: Recommended Reading
